

# Joachim Tan

## FULL STACK DEVELOPER

### SUMMARY

I am currently a **Penultimate Computer Science Major** at the **University Of Exeter**. My interests are in **Full Stack Development** and **Quantitative Trading**.

I have always been interested in the inner workings of websites and applications. I wrote my first few programs in **Python** guided by a book that my parents had bought. The time spent working on them brought me much joy.

I had my first formal coding class when I enrolled in Singapore Polytechnic. I had so much fun doing school projects that I took on my own side projects, making telegram bots and coding a system in **C++** that would record my online shop sales. The experience made me fall in love with the process of building products that improve our lives.

During my National Service, I continued pursuing my interest by taking online courses on **SEO, Django, Figma & React**. These skills helped me build my own website and host my expense tracker telegram bot using **Heroku**.

## RELEVANT EXPERIENCE

### Data Analyst Intern

**SG Enable**

**May 2022 - Present**

- Streamlining Data collection and visualization, improving productivity and reducing visualization time by 50%.
- Manipulating Data to gain further insights, predict trends & sudden spikes in assistance requests to better prepare infrastructure to meet sudden demand.

### Instructor

**Little Coder**

**Jan 2022 - Present**

- Languages: Python, Java, Lua, JavaScript, HTML5, CSS
- Software: Scratch, Visual Studio
- Teach and conduct coding, STEM and technology related classes and programs.

### Engineering Intern

**Royal Dutch Shell**

**Mar 2019 - Aug 2019**

- Communicated with the Reliability Department stakeholders on their needs.
- Proposed and developed a solution using VBA that reduced time taken to analyze data by 50%.

## EDUCATION

### Bsc Computer Science

**University Of Exeter**

**2022-2024**

- Entry Into 2nd Year.

### Diploma in Computer Engineering

**Singapore Polytechnic**

**2022-2024**

- Vice Captain & Treasurer of the Waterpolo Team

## PROJECTS

### Climate Hack Hackathon 2022

**Team Leader, Technical Lead**

## SKILLS

**Languages:** HTML, CSS, JavaScript, Python, C++, Java, VBA, Lua, React.js

**Tools:** Figma, Django, Git, Bulma, Bootstrap, Bulma
